

As a patriotic US citizen I am completely appalled at the way in which Chairman Powell has handled the current proceedings regarding changes to FCC regulations regarding media ownership etc. The importance of transparency and government accountability cannot be underscored in a Democracy and both of these two ideals have been trampled upon by Chairman Powell and the FCC. As a concerned citizen I demand that the June 2nd date for vote on the new media control issues (deregulation) be postponed until further research, study and debate regarding the proposed changes can occur. I also demand that the details which are to be up for vote regarding increased deregulation be made public so that we all, both citizens and government can engage in the debate and study that is appropriate to this important issue of increased deregulation of US media.
